## PROFESSIONAL SUMMARY

Data Analyst with a strong technology background and 20+ years of experience in high-tech and digital products. Hands-on skills in SQL, Python, Pandas, Excel, Power BI and DAX, including data cleaning, transformation, exploratory analysis, KPI analysis and dashboard development. Brings a distinctive combination of analytical thinking, technical knowledge and UX/UI expertise, with a strength in designing clear, intuitive dashboards and communicating insights.

## CORE SKILLS

**Data Analysis:** SQL, Python, Pandas, Excel, Exploratory Data Analysis (EDA), Data Cleaning

**BI & Reporting:** Power BI, DAX, KPI Analysis, Business Reporting, Data Visualization

**Data Preparation:** Power Query, Data Transformation, Data Modeling, Calculated Measures

**Dashboard & UX:** Interactive Dashboards, Data Storytelling, Figma, UX/UI, Information Design

## DATA ANALYTICS PROJECTS

### Amazon E-Commerce Data Analysis | Power BI, DAX, Power Query

- Developed an interactive 6-page dashboard analyzing sales, customers, products, discounts, returns and delivery performance (500 purchases, 181 users, 307 sellers).
- Built a relational data model, transformed data in Power Query, and created DAX measures for revenue, profit, margins and business KPIs.
- Applied UX/UI and Figma expertise to design clear dashboards and communicate business insights.

### Employee Attrition Analysis | Python, Pandas

- Performed exploratory data analysis to investigate employee attrition patterns across department, age group, burnout, overtime and engagement.
- Cleaned and prepared data, handled missing values, created derived groups and identified high-risk employee segments.
- Used Pandas groupby, pivot tables, crosstab and statistical analysis to compare employee groups and derive insights.

### Amazon E-Commerce Database Analysis | SQL Server

- Designed a normalized relational database from raw e-commerce data, separating entities such as products, brands, categories, sellers, users and purchases.
- Used primary and foreign keys to support data integrity and wrote SQL queries to analyze sales, product/category performance and purchase metrics.

## PROFESSIONAL EXPERIENCE

### Yad2, Israel | Frontend Developer | 2018–2025

- Developed responsive web applications using HTML5, SCSS, JavaScript, React and Vue; worked with APIs, reusable components and application state.
- Collaborated with product managers, designers and developers to deliver user-centered digital products and investigate technical issues.

### Yad2, Israel | UX/UI Designer | 2004–2018

- Designed web and mobile user experiences, wireframes, prototypes and information structures with a focus on usability and clear communication.
- Worked with developers and product teams to translate business and user requirements into practical solutions; performed visual and usability reviews.
- Founding team member of Yad2 (2004); contributed to the establishment and growth of a leading Israeli online platform.

## EDUCATION & TRAINING

### John Bryce | Data Analyst Course | 2026

SQL, Python, Pandas, Excel, Power BI, DAX, data visualization and dashboard development

### Technion – Israel Institute of Technology | Practical Engineering Diploma | 2001–2003

Interactive Communication, Multimedia & Internet

## ADDITIONAL TECHNICAL SKILLS & LANGUAGES

Frontend: HTML5, CSS/SCSS, JavaScript, React, Vue, Next.js (basic), Node.js (basic) | Tools: Git, Jira, Tailwind, Cursor AI, Postman

Languages: Russian (Native), Hebrew (Native), English (Good proficiency)
